**Title: SIG Environmental Policy and Principles**

---

- In its decisions and actions, SIG is oriented towards sustainable development and economical use of natural resources, while taking into account the values and requirements of its customers, political circles and society.
- We take into consideration environmentally relevant aspects along the entire value chain - from the initial product concept, the development of new products and systems, the selection of suppliers, right through to the end-user and recycling of our products.
- Within the scope of our activities, our objective is to continuously improve our environmental performance, while reducing the impact on the environment to an absolute minimum by utilizing a systematic and integrated environmental management system.
- We commit to adhere to all environmentally relevant laws and regulations, as well as other environmentally relevant requirements that are applicable to our line of business.
- We create suitable processes for improving our environmental performance and, within the scope of our environmental programme, set verifiable objectives and measures for the various business units and verify the adherence and fulfillment of those objectives and measures.
- Through appropriate communication and training initiatives we continuously ensure that all employees are aware of, and understand, the requirements of our Environmental Policy, thereby promoting environmental awareness.
- We communicate ecological aspects openly and transparently to relevant target groups and seek dialogue with them.
- The SIG Environmental Policy and –Principles are valid for all sites worldwide.
